

Generator at Greenfield Center Station is up and operating.

I am pleased to announce that the generator for the Greenfield Center fire station is up and operating. The installation was completed in July. This initiative has been a year and a half in the making, and through hard work and diligence it is truly gratifying to see it finally come together. I would like to thank everyone who helped out through the entire process. Special thanks to firefighter Harold Hall, Jr. for the countless hours he devoted to this project. Without his input and expertise this would have been a much more difficult task.

As we continue our initiative to equip our remaining facilities with emergency generators, I am reminded how fortunate we have been in securing moneys through Senator Hugh Farley in our campaign, and would like to thank him for his effort. Additionally, we will be adding smaller portable generators as well to assist folks who rely on various machines to keep healthy in the event of a prolonged power outage. Just one more way we continue to serve our tax payers. Thanks again.

Tom Robarge
Fire Commissioner
Greenfield Fire District.
